## The Strike Commission.

Chicago, Aug. 20.—E. V. Debs was on the witness stand before the Commission today. In answer to a question he said:

"I found that all of the men were working for the Pullman Company at wages upon which they could not live. I found that salaries had been cut time and again, until skilled mechanics were working their lives away for wages not sufficient for day laborers; that the town of Pullman was so schemed that every penny the workingman made found its way back to the Company. In fact I found the workingmen of Pullman in a pitiable condition and determined to do all in my power as President of the A. R. U. to improve the condition of those men. The strike followed, ordered by the men themselves. Then came the boycott, ordered by duly elected delegates to our convention, and then followed the railroad strikes, ordered by various local unions, each of which had a grievance of its own."

The Strike Commissioners have notified George M. Pullman to appear and testify and will also call for several members of the General Managers' Association.

### Concert of Electricity and Music.

The concert last night was well attended and gave much satisfaction. Signors Bistolfi and Montonelli have just concluded an engagement at the Orpheum Theater, San Francisco, and have appeared at several of the largest receptions held in the city during the Midwinter Fair. Signor Montonelli is a master of the mandolin and has invented an electrical system connecting his mandolin by innumerable small wires to an organ that has a pedal bass attachment and gives a power nearly equal to a pipe organ. As he presses the metallic strings of the mandolin on the finger board, the electric current between the mandolin and organ is complete and both instruments answer to the touch and not only is the melody distinct, but the harmony produced is magnificent.

Signor Bostolfi is an artist and a master on the guitar. His instrument, however, is an invention of his own, not only having the strings, fret-board, etc., of the guitar, but an additional neck and set of brass strings similar to a harp. He is a splendid performer on this instrument. He also has a flute attachment to the guitar, on which he performs exquisitely.

They will appear again this evening with a complete change of programme.

### Towed Her In.

A few weeks ago a very fat woman who was stopping at McKinney's went out fishing and had a boatman to row her to the snag.

She got a big trout on the end of the line and became so excited that she fell overboard. She made an attempt to climb back over the side of the boat but the old fisherman begged her to desist as her weight would surely upset the boat. After a parley she finally consented to allow a rope passed about her waist and after this was done he towed her ashore.

### The Jockey Club.

Owing to the dates heretofore named for the holding of the Jockey Club meeting here, conflicting with dates of races in the northern counties the Directors have decided to change the date of the meeting from September 10th, to 14th, to October 2d to 6th inclusive. This will give horses entered at other meetings a chance, and will afford a better opportunity for racing men to come here.—Journal.

### A New Departure.

Next Saturday evening a mass meeting of the People's party will be held in the open air at Nevada City. The object of the meeting is to elect two delegates in each precinct of Nevada Township to the County Convention to be held August 30th. The Transcript says the idea of selecting delegates to a convention at a street meeting is a new departure.

### Truth About the Strike.

President Gompers of the Federation of Labor has an able article in the August "North American Review" and "Federationist" concerning the Pullman and A. R. U. strike. It reviews the cause and justifies the strikers. Every man whose capital consists of brains and muscles, and who aims at an honest living, should read these articles. It costs just half as much as a cigar and does not "end in smoke."

For sale at Cagwin & Notewares for a nickel.

## A Warning to Horsemen.

About thirty-five miles from here on the Placerville road is a place called Meyers Station.

At that point is a well of ice cold water, so cold that one can hardly drink it and a horse who comes in from a warm drive is certain to be taken with cramps in the stomach and be laid up sick if it drinks the water fresh from the well.

There is a trough near the well supplied with spring water from the mountains which is excellent water for horses, being of the proper temperature. It is supplied through a pipe, but at times the pipe is out of order and the trough empty. On these occasions the traveller waters his horses from the well always with bad results.

The people at the station do not seem to have enough sense to warn people of the dangers of the well and it is claimed that several horses have died from big draughts of the icy water. A small sign warning the traveller of the danger and telling him to let the water stand in the sun a few minutes would save a great deal of trouble.

### Blowholes in Castings.

New York, August 20.—The United States Government is proceeding against the members of the great steel manufacturing firm known as the Benjamin Atha and Illingworth company of Newark, N. J.

The charge is conspiracy to defraud the Government by furnishing castings for the Navy Department that contained blowholes, which were plugged. President John Illingworth and Secretary A. C. Denman of the big steel company, were arrested today and released on their own recognitions in the sum of \$1000 for appearance next Tuesday before United States Commissioners Romaine in Jersey City. The charges are similar to those against the Carnegie Steel Company in the matter of steel plates.

### A Sad Death.

Ada, the infant daughter of Mr. and Mrs. D. Cottrell aged a little over 22 months, was buried yesterday afternoon, Rev. Mr. Mitchell officiating. The little child was the sunshine of the family, and a large number of sympathizing friends gathered at the bier of the little one and shared the parents' grief.

By the burning of a train of oil and other freight cars at Cheektowaga the New York Central loses \$100,000. Brakeman T. J. Snyder was blown from the top of the cars and covered with the burning oil. He will be disfigured for life.

While some workmen were digging recently among the ruined temples of upper Egypt, they unearthed an iron box containing a metal plate, which two scientists who have reputations at stake, declare to be a camera and lens.
